

*Fabricare is pleased to be able to offer our clients products and materials that are environmentally safe, have eco-friendly properties and have met Oeko-Tex Standard 100. (A number of our fabrics have been manufactured from recycled clear plastic bottles.) As more and more products become available in the textile market place we will make our clients aware of these additional choices and options.*

*All fabrics offered by Fabricare meet or exceed NFPA 701 (2004) standards. Our cubicle fabrics are inherently anti-microbial but can be treated for additional "just in case" protection.*

*In addition to offering "Green" products, we at Fabricare make serious efforts to maintain an environmentally responsible workplace. We support a substantial number of conservation organizations and actively "reduce, re-use, and recycle".*
